

Custom Protein and Antibody Production Service

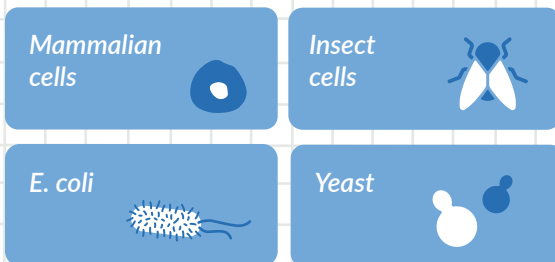

LubioScience offers full project support!

Fast & personal consultation

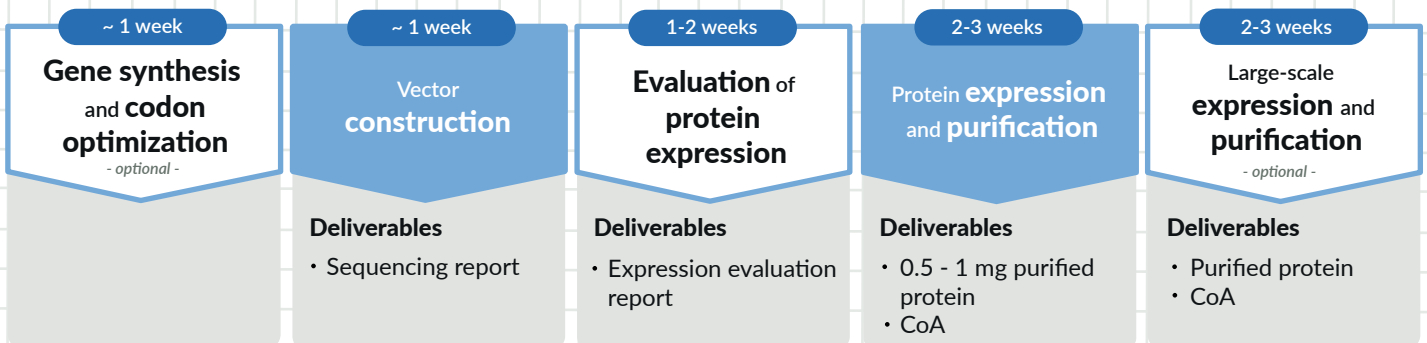

Recombinant protein production service

Multiple protein expression systems

- One-stop solution from gene to protein, process development and large scale production
- State of the art production technologies and facilities
- Comprehensive QC
- Extensive experience with poorly soluble or instable proteins, secreted proteins and membrane proteins
- IP-free strains and cell lines

Protein production service workflow

Service options

Purification options

- With or without purification tags (Fc, His, GST, FLAG, SUMO, Myc, HA)
- Cleavable tag option

Quantity specifications

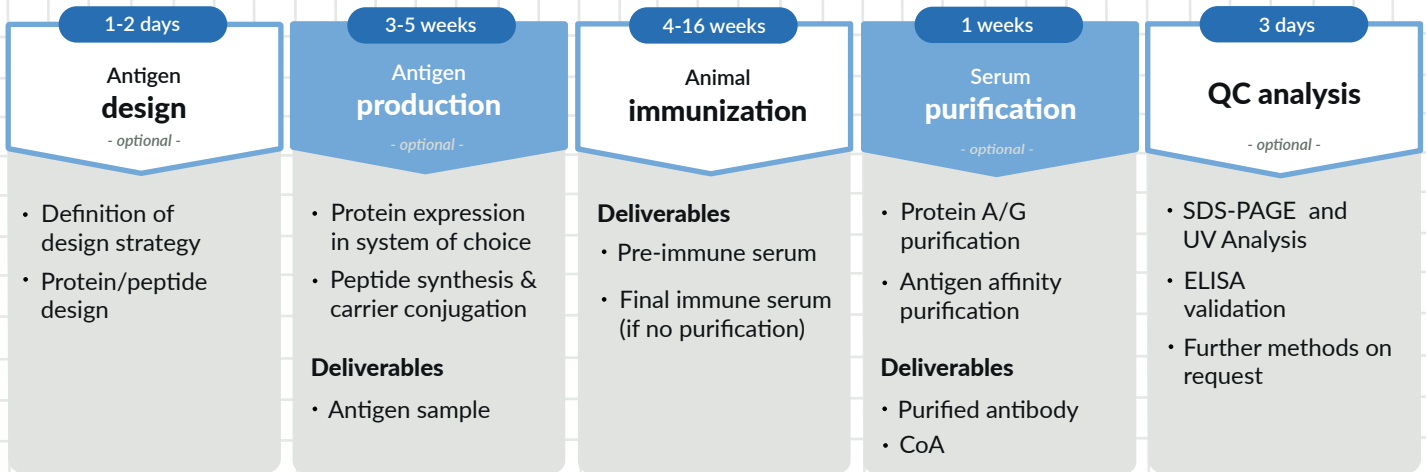

- Standard package: > 90% purity by SDS-PAGE
- Customized package: HPLC-SEC, endotoxin levels, others (upon request)

Antibody production service

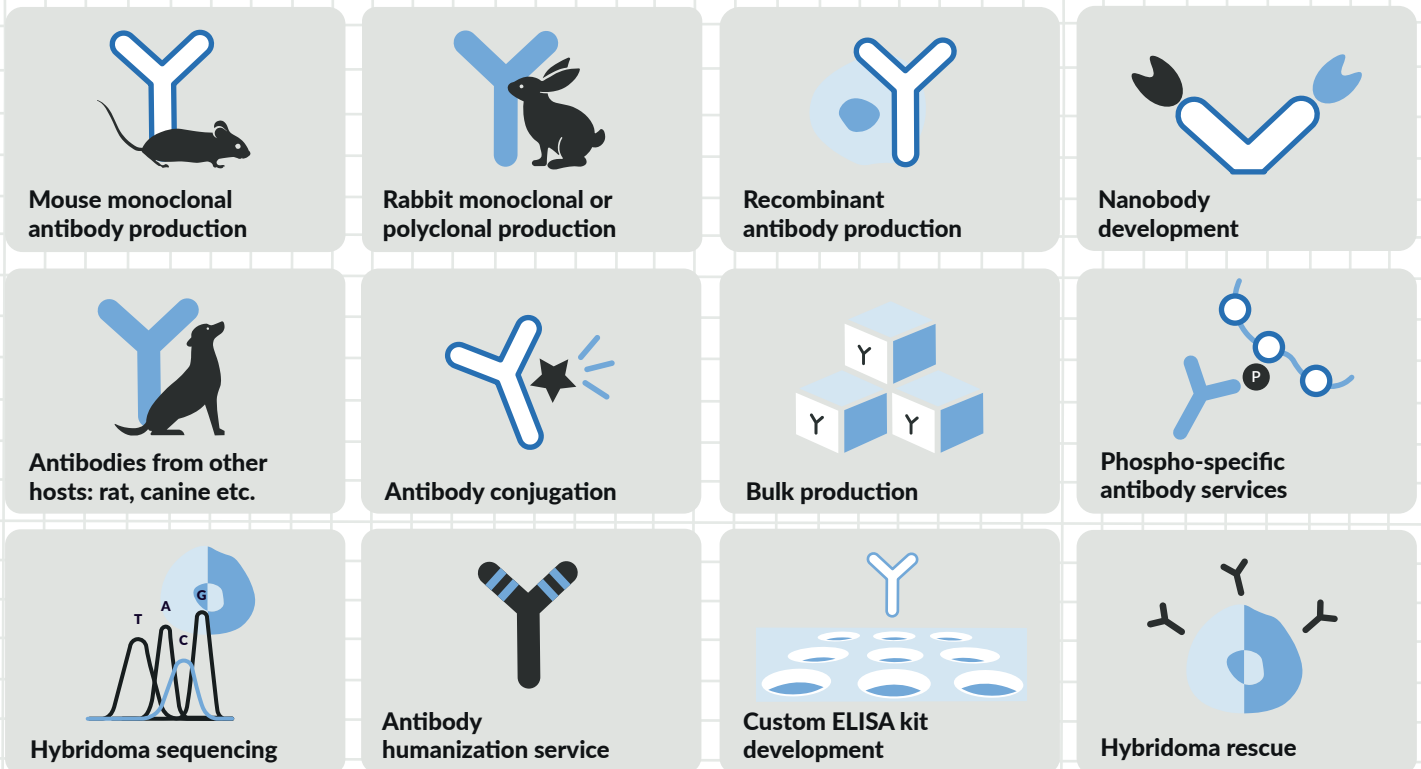

- > 99% success rate, cutting edge technologies
- Antibody format and species diversity
- Optimized immunization strategies for protein, peptide and DNA antigens
- Strong commitment to animal welfare
- Vast species diversity (rabbit, mouse, goat, lama, alpaca, chicken, etc.)
- All custom antibody development services are confidential

Polyclonal antibody production workflow

Comprehensive antibody development & production services
